

§ 400.304

7 CFR Ch. IV (1-1-01 Edition)

year, to discount the effect of indemnities caused by widespread adverse growing conditions. Adjustments are determined as follows:

(1) Determine the average yield for the county using the annual county crop yields for the previous 20 crop years, unless such data is not available;

(2) Determine the normal variability in the average yield for the county, expressed as the standard deviation;

(3) Subtract the result of § 400.303(d)(2) from § 400.303(d)(1);

(4) Divide the annual crop yield for the county for each crop year in the NCS base period by the result of § 400.303(d)(3), the result of which may not exceed 1.0;

(5) Subtract the result of § 400.303(d)(4) for each crop year from 1.0;

(6) Multiply the result of § 400.303(d)(5) by the liability for the crop year; and

(7) Subtract the result of § 400.303(d)(6) from any indemnity for that crop year.

(e) FCIC may substitute the crop yields of a comparable crop in determining § 400.303(d) (1) and (2), or may adjust the average yield or the measurement of normal variability for the county crop, or any combination thereof, to account for trends or unusual variations in production of the county crop or if the availability of yield and loss data for the county crop is limited. Information about how these determinations are made is available by submitting a request to the FCIC Regional Service Office for the producer's area. Alternate methods of determining the effects of adverse growing conditions on insurance experience may be implemented by FCIC if allowed in the Special Provisions.

§ 400.304 Nonstandard Classification determinations.

(a) Nonstandard Classification determinations can affect a change in assigned yields, premium rates, or both from those otherwise prescribed by the insurance actuarial tables.

(b) Changes of assigned yields based on insurance experience of insured

acreage (or of a person on specific insured acreage) will be based on the simple average of available actual yields from the insured acreage during the base period.

(c) Changes of assigned yields based on insurance experience of a person without regard to any specific insured acreage will be determined by an assigned yield factor calculated by multiplying excess loss cost ratio by loss frequency and subtracting that product from 1.00 where:

(1) Excess loss cost ratio is total indemnities divided by total liabilities for all years of insurance experience in the base period and the result of which is then reduced by the cumulative earned premium rate, expressed as a decimal, and

(2) Loss frequency is the number of crop years in which an indemnity was paid divided by the number of crop years in which premiums were earned during the base period.

(d) Changes of premium rates will be made to reflect premium rates that would have resulted in insurance experience during the base period with a loss ratio of 1.00 but:

(1) A higher loss ratio than 1.00 may be used for premium rate determinations provided that the higher loss ratio is applied uniformly in a county; and

(2) If a Nonstandard Classification change has been made to current assigned yields, insurance experience during the base period will be adjusted to reflect the affects of changed assigned yields before changes of premium rates are calculated based on that experience.

(e) Once selection criteria have been met in any year, Nonstandard Classification adjustments will be made from year to year until no further changes are necessary in assigned yields or premium rates under the conditions set forth in § 400.304(f). In determining whether further changes are necessary, the eligibility criteria will be recomputed each subsequent year using the premium rates and yields which would have been applicable had this part not been in effect.

(f) Nonstandard Classification changes will not be made that:

(1) Increase assigned yields or decrease premium rates from those otherwise assigned by the actuarial tables, or

(2) Result in less than a 10 percent decrease in assigned yields or less than a 10 percent increase in premium rates from those otherwise assigned by the actuarial tables.

§ 400.305 Assignment of Nonstandard Classifications.

(a) Assignment of a Nonstandard Classification of assigned yields, assigned yield factors, or premium rates shall be made on forms approved by the Corporation and included in the actuarial tables for the county.

(b) Nonstandard classification assignment will be made each year, for the year identified on the assignment forms, and are not subject to change under the provisions of this subpart by the Corporation for that year when included in the actuarial tables for the county, except as a result of a request for reconsideration as provided in section 400.309, or as the result of appeals under 7 CFR part 11.

(c) A nonstandard classification may be assigned to identified insurable acreage; a person; or to a combination of person and identified acreage for a crop or crop practice, type, variety, or crop option or amendment whereby:

(1) Classifications assigned to identified insurable acreage apply to all acres of the insured crop grown on the identified acreage;

(2) Classifications assigned to a person apply to all insurable acres of the insured crop on which the person and any entity in which the person has substantial beneficial interest is actively engaged in farming; and

(3) Classifications assigned to a combination of a person and identified insurable acreage will only apply to those acres of the insured crop grown on the identified acreage on which the named person is actively engaged in producing such crop.

[55 FR 32595, Aug. 10, 1990, as amended at 62 FR 22877, Apr. 28, 1997]

§ 400.306 Spouses and minor children.

(a) The spouse and minor children of an individual are considered to be the

same as the individual for purposes of this subpart except that:

(1) The spouse who was actively engaged in farming in a separate farming operation prior to their marriage will be a separate person with respect to that separate farming operation so long as that operation remains separate and distinct from any farming operation conducted by the other spouse;

(2) A minor child who is actively engaged in farming in a separate farming operation will be a separate person with respect to that separate farming operation if:

(i) The parent or other entity in which the parent has a substantial beneficial interest does not have any interest in the minor's separate farming operation or in any production from such operation;

(ii) The minor has established and maintains a separate household from the parent;

(iii) The minor personally carries out the farming activities with respect to the minor's farming operation; and

(iv) The minor establishes separate accounting and recordkeeping for the minor's farming operation.

(b) An individual shall be considered to be a minor until the age of 18 is reached. Court proceedings conferring majority on an individual under 18 years of age will not change such individual's status as a minor.

§ 400.307 Discontinuance of participation.

If the person has discontinued participation in the crop insurance program, the person will still be included on the NCS list in the county until the person has discontinued participation as a policyholder or a person with a substantial beneficial interest in a policyholder for at least 10 consecutive crop years. The most recent nonstandard classification assigned will be continued from year to year until participation has been renewed for at least one crop year and at least three years of insurance experience have occurred in the current base period. A nonstandard classification will no longer
